

Starting on Wednesday, July 22<sup>nd</sup>, **all Zoom meetings you schedule will have a password enabled by default.**

### **Why?**

Zoom requires that all meetings have a password enabled by September 27<sup>th</sup>.

### **What changes?**

This won't affect the two primary ways that participants join meetings:

- Clicking an invite link – The password is included in the link.
- Joining through D2L > Communications > Zoom – NSU – The password is included in the “Join” button.

If a participant manually types in the Meeting ID to join a meeting, they will need to enter the password.

### **What if I already scheduled meetings?**

If your meeting(s) will happen before September 27<sup>th</sup>, no changes are necessary.

If you have already scheduled meetings or plan to use your Personal Meeting Room (e.g. office hours) after September 27<sup>th</sup>, you must:

- Access your list of meetings (either at <https://northern.zoom.us> or through D2L > Communications > Zoom – NSU)
- Edit your meeting
- Add a password (you must create your own)
- Resend the meeting invitation/calendar item or update your link in D2L with the new URL
